Michael C Ferrey

Computer Skill is a subject that interests me because it allows you to have an open mind and create many different programs or other simulations that are computer programmed.

Skills

I am a hard working person when it comes to working with others or self projects.
Reading and writing are some skills that I have brought up a lot as well as problem solving.
Time management is a big skill that is very important.

Experience

Computer science club: This was an after school club my High School "Freedom High School" Had over the summer. We learned how to clear and reset computers as well as set them up to get used for new incoming students. This involved going into a program that allowed us to either reset the computer or edit it to make it able to be used.

Other : Use of python , microsoft , video code in classes I took throughout high school

Education

Albright College Freshman class of 2028 as of August 24th , 2024
Major in Computer Science to get an education which will lead to a job or work study to help be successful after College

Freedom High School : Bethlehem Pa 18017
I graduated Freedom High June 17 of 2024 which I was given my High Diploma
GPA : 3.5
